- Choose the company for which you want to report

- Filter can also be used by date (setting the period from ... to ...)

- If no period is specified, all the policies of the company will be fetched

- After choosing the company, all the policies of this company will be

  fetched in the period specified

- There are several options available to add to the report and change the

  resulting math operations such as

  ★ The discount is a monetary value that is deducted from the total of each

  policy separately

  ★ The fuel charge is a financial value that is added to each policy

  ★ Postal fees: A financial value added to each policy whose default value

  (0.1 = 10%) can be changed

  ★ Value Added Tax (Vat Tax) A monetary value that is added, and its default

  value (0.14 = 14%) can be changed

  ★ Other fees: A financial value that can be added for any reason according

  to the need and change of work

★ The type of service is also chosen, as based on it, additional fees can be added according to the type of service
